to house a variety of liquids from waste water to petrochemicals.

Because most ASTs house material that is flammable or toxic, the Federal government has enacted strict aboveground storage tank regulations to reduce or eliminate personnel injury or environmental contamination due to explosion or spilling.

storage tank regulations - Canada.ca

Storage tanks are containers that hold liquids, compressed gases (gas tank; or in U.S.A "pressure vessel", which is not typically labeled or regulated as a storage tank) or mediums used for the short- or long-term storage of heat or cold. The term can be used for reservoirs (artificial lakes and
